

COFAR: Commonsense and Factual Reasoning in Image Search

Prajwal Gatti, Abhirama S. Penamakuri,
Revant Teotia, Anand Mishra,
Shubhashis Sengupta, Roshni Ramnani

Can linking images to encyclopedic
knowledge enable commonsense
and factual reasoning in image
search?

Problem

A queue of people

Problem

A queue of people

...

...

[Johnson et al., CVPR'15], [Faghri et al., BMVC'18], [Zhang et al., CVPR'19]

Problem

A queue of customers patiently waiting to buy ice cream

Who are customers?
Who is selling ice cream?

“Saint Peter's Basilica is a church located in Vatican City.”

We introduce COFAR

A dataset for Image Search requiring
Commonsense and Factual Reasoning

“The captain of the Argentina national football team celebrating after scoring a goal”

“Two people getting married in front of a tower in Paris”

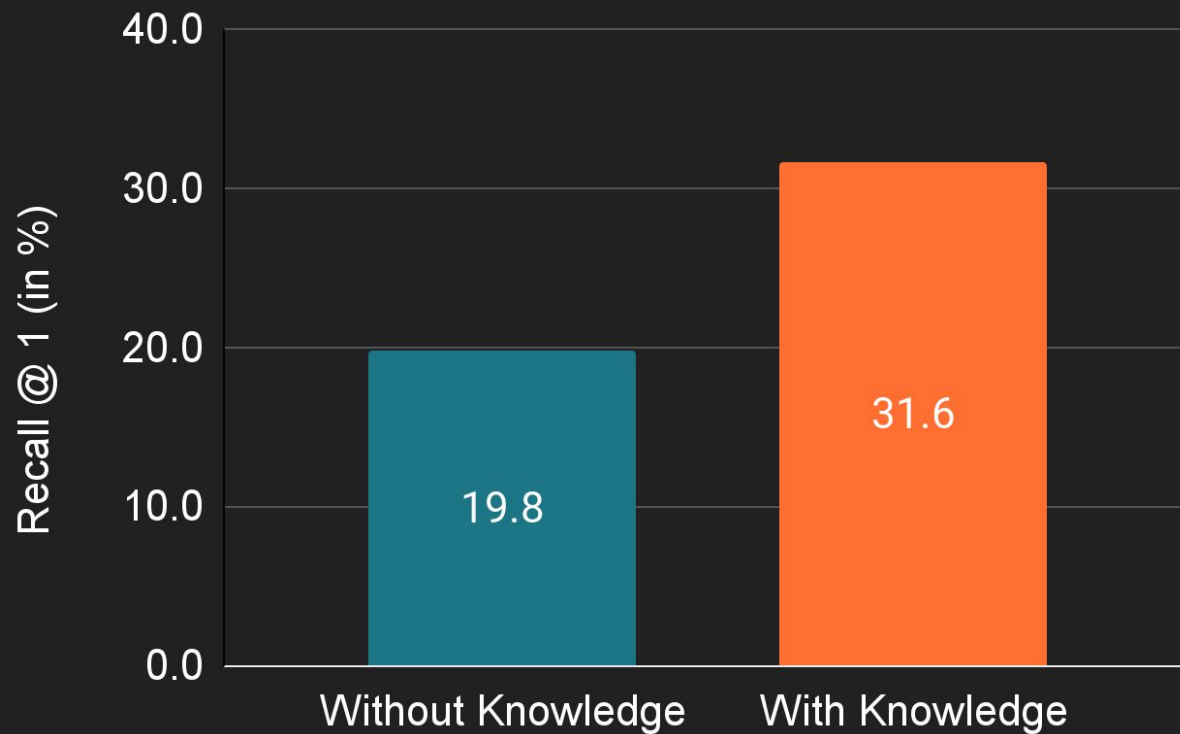

“Two people showing an interesting to purchase a watch”

Dataset Statistics

- 25K+ Images
- 40K+ Text queries
- 5K+ Named Entities
- Includes banks, restaurants, actors, athletes, landmarks, monuments, and more

Our Baseline Model (KRAMT)

Thank you!

Visit our project page for Code and Dataset
